

FOG CANNON

HERMAN (NANJING) TECHNICAL & ENGINEERING

Through the nozzle, spray water mist into tiny water grains, then the tiny water grains carry the dust and make it down. So the fog cannon is used to purify air. It can be used in the large grand which is full of dust.

>> Numbering rules for fog cannon

HWJ XX-XXXX(XXX)

- XXX indicates function of products with digital 0-9 or abbreviation letters.
- According to the dust-fall range, digital 0-9 indicates basic parameters of the products.
- Digital 0-9 indicates development sequence of products.
- H indicates a Herman product, WJ indicates fog cannon.

Type	Hwj24-0030	Hwj24-0050
Dimension	2500x1170x2000mm	2500x1300x2100mm
Weight	700kg	780kg
Blower Power	11.0kw	18.5kw
Multilevel Booster Pump Power	3kw	4kw
Power When Shocking	0.37kw	0.37kw
Water Consumption	2.8m3/h	4.2m3/h
Dust Range	Distance 20-30m Sectoral Angle 120	Distance 40-50m Sectoral Angle 120
State Of Transfer Trolley	No Power	No Power
Power Source	15kw 380v 50hz	23.5kw 380v 50hz
State Of Water	Water Supply More Than 2.8m3/h	Water Supply More Than 2.8m3/h
Water Supply Pipe Diameter	Hose Length More Than 25mm	Hose Length More Than 50mm
